

Chse a nw ps wrd for yur Orbi nd hit th Sbmit ptin

20 Nov, 2025

Grab an Ethernet cable and create a connection between your Netgear Orbi router and the existing modem. Then, switch on the Orbi satellite and sync it with the Orbi router.

Once your Orbi router and satellite get synced, switch on your laptop and open up a web browser. You are free to use any web browser you like.

Enter orbilogin.net in the address bar of your web browser and press the Enter key.

You will be asked to fill in the default username and password of your Netgear Orbi router. Enter the default admin details in the required fields, then hit Log In.

As soon as you hit Log In, you will land on the Netgear Genie smart setup wizard. Locate the Settings option. Once found, click on Settings > Wireless Settings.

Then, fill in the new password under the Password field that you want your Orbi device to have and click on the Apply button.

Your changes will get saved the minute you hit Apply.

Quick Tip: In case you aren't certain regarding the default username and password of your device, then it is recommended that you refer to the user manual. You'll find every little detail about your device in there.

Before you learn how to recover the password of your Netgear Orbi, make sure that your device is receiving enough power supply from its wall socket. Also, ensure that you have enabled the password recovery feature by performing Netgear Orbi login. Otherwise, you won't ever be able to recover the lost password of your WiFi device.

For those who have enabled the password recovery feature, mentioned below are the step-by-step guidelines that they need to take a glance at:

Switch on your PC and go to the official website of Netgear Orbi.

Locate the 'Forgot Your Password' option.

Once found, select it. You will land on the 'Reset Your Password' window.

Submit your personal details and hit the 'Reset Your Password' option.

An email will be sent to your registered email ID along with the link to reset the lost password.

Open the mail and click on the link given. Select the 'change your password' option.

.

In this manner, you'll be able to recover the password of your Netgear Orbi device. In case you still can't recover the orbi admin login password, then you just have one option left. And that is performing Orbi factory default reset.

Mentioned below are the steps that'll assist you in restoring your Netgear Orbi device to its default mode:

Open a new tab on your internet browser.

Access the dashboard of your device via orbi Netgear login and go to the Settings.

Select Administration and click on Erase > Restore to factory default mode.

After resetting your Netgear Orbi device, you can perform the setup process from scratch and change the default password.
